Bandung, West Java,
Indonesia

Summary

Senior Mobile Engineer with 9+ years of experience in mobile development and 4+ years specializing in Flutter. Expert in building production-ready mobile apps, migrating native iOS apps to Flutter, and delivering intuitive, high-performance user interfaces. Known for writing clean, maintainable code and designing scalable architectures that support long-term growth. Proven track record of shipping apps to the App Store and Play Store and collaborating with cross-functional teams in fast-paced environments.

Core Skills

Languages: Dart, Swift, Objective-C, JavaScript

Frameworks: Flutter, UIKit, Firebase, REST APIs

State Management: GetX, Provider, Bloc

Architecture: MVVM, Clean Architecture, Modular Design

Mobile Features: Authentication (Google/Apple), Push Notifications, In-App Purchases, Offline Sync

Tools: Git, CI/CD, Fastlane, Jira, Slack, Figma

Platforms: iOS, Android

Specialties:

- Native → Flutter migration
- Real-time chat & SDK development
- Performance optimization
- App Store / Play Store release pipelines
- Remote collaboration & async workflows

Work Experience

Freelance & Contract iOS Development

Dates: 2019 - Present

- **JAGO INC.** – U.S. Client based IT Consultant
 - **Anne Craig Fitness** – Migrating an existing iOS application to React Native (Expo) to improve cross-platform support and reduce long-term maintenance cost.
 - **Washbox** – Supported the app and integrated multi-country payment gateways, improving cross-border transaction reliability.
 - **CFS Checklist** – Developed a mobile checklist app for daily fire safety inspections, enabling site directors to log risks and generate PDF reports for code compliance and official sharing.
 - **Playfield** – Spearheaded the development of a Flutter app from conception to deployment, successfully launching on both the Playstore and AppStore. Delivered a seamless, high-performance user experience and ensured comprehensive post-launch support.
 - **Mililani Town Association** – Transitioned a web-based application to a native app, significantly enhancing user experience and performance. Led the project from initial design through to final deployment, resulting in increased user engagement and satisfaction.

Indonesian Team Lead, Digital ZAT Company (ZAT App)

- **Dates Employed:** 2021 – July 2025
- **Responsibilities and Achievements:**
 - Leadership: Led a diverse team of developers, designers, and QA engineers, fostering a collaborative and productive work environment.
 - Project Management: Oversaw the entire project lifecycle, from initial planning and requirements gathering to development, testing, and deployment.
 - Technical Guidance: Provided technical direction and mentorship, ensuring best practices in coding standards, architecture, and performance optimization.
 - Product Development: Played a key role in designing and implementing new features, enhancing the app's functionality and user experience.
 - Quality Assurance: Ensured high-quality deliverables by implementing rigorous testing protocols and continuous integration/continuous deployment (CI/CD) pipelines.
 - iOS Development: Initially worked as an iOS developer, contributing to the development and maintenance of native iOS applications.
 - Migration to Flutter: Led the migration of native applications to Flutter in the last year, improving cross-platform compatibility and maintainability while maintaining high performance and user satisfaction.

iOS Developer, [AVANA](#).

- **Dates Employed:** 2021 – 2022
- **Responsibilities and Achievements:**
 - Leadership: Led a diverse team of developers, designers, and QA engineers, fostering a collaborative and productive work environment.
 - Led the development of new features, feature enhancements, and bug fixes, ensuring high-quality releases.
 - Successfully submitted multiple updates to the App Store, enhancing app performance and user satisfaction.
 - Collaborated with designers and backend developers to deliver cohesive and efficient mobile solutions.

iOS Developer, [Geekseat Indonesia](#).

- **Dates Employed:** 2019 –2021
- **Responsibilities and Achievements:**
 - Developed a Minimum Viable Product (MVP) iOS application for an Australian client, delivering a fully functional prototype under tight deadlines.
 - Migrated an iOS native application to Flutter, improving cross-platform performance and maintainability.
 - Contributed to updating React Native applications to version 0.60+, addressing key compatibility issues and improving overall stability.
 - Fixed issues in Cordova mobile applications, ensuring smooth functionality across various devices.
 - Implemented new features in Flutter mobile applications, enhancing user experience and expanding app capabilities.

iOS Developer, Metraplaza (blanja.com).

- **Dates Employed:** 2018 – 2019
- **Responsibilities and Achievements:**
 - Contributed to the development and maintenance of iOS applications, collaborating closely with cross-functional teams to deliver high-quality software.

iOS Developer, [WGS](#)

- **Dates Employed:** 2016 – 2018
- **Responsibilities and Achievements:**
 - Developed and maintained iOS applications, focusing on performance optimization and user interface improvements.
 - Collaborated with designers and backend developers to deliver cohesive and efficient mobile solutions.
